

# Anne Arundel Community College – Health Sciences and Biology Building

The Anne Arundel Community College (AACC) Health Science and Biology Building project is an estimated \$96.5 million, 175,000 square foot new Health Science and Biology Laboratory building on the AACC main campus in Arnold, Maryland. This new facility will support all departments under the School of Health Sciences and Department of Biology, as well as allow for the expansion of related space for lab services, meeting rooms, study and resource space, and informal collaboration areas. The new building will be situated on a 4.3 acre site currently occupied by the Olson Memorial Pool, Lila R. Schwartz Building, and portion of Ring Road and Parking Lot D. This will require demo of these two buildings, the rerouting of the Ring Road, and the reconfiguration of the parking areas. A new science quad on the southern end of the new building will highlight AACC's campus-wide green space improvements, and will transform the East campus, creating a vibrant hub for College and community activities. The project is currently in preconstruction phase, with preliminary planning and design having kicked off in January 2018. The new building will consist of biology teaching laboratories, classrooms, lecture halls, healthcare simulation labs, faculty offices, and collaborative spaces for studying and learning. Demolition of the existing buildings is expected to occur during the summer of 2018, with the new building construction starting the summer of 2019. Project completion is Summer of 2021.

## **BID SCHEDULE:**

***Phase I - Demolition:*** February 2018

***Phase II – Ring Road Relocation / Utilities:*** August 2018

***Phase II – New Building:*** December 2018
